# TARGETRECRUIT

TargetRecruit Portals:

What's New

We're excited to introduce a new portal experience with an intuitive and user-friendly interface. Our latest enhancements are more user-centric with improved flexibility for modifications and customization without the need for development resources.

Increased Flexibility for Administrators

Easy Configuration
No coding is required—make modifications with simple clicks. Admins can configure search fields, job details, summaries, and labels with clicks-not-code.

Custom Application Pages
Tailor the candidate application process by modifying the pages directly in the portal.

Multiple Brand Identities
Easily represent different brands for various parts of your organization by setting up multiple sites, perfect for recruiting firms with numerous divisions.

Streamlined Performance and Architecture

Faster Loading Times
Leveraging the latest Salesforce platform technologies, the portals now offer quicker loading times and easier navigation, ensuring a seamless user experience for both administrators and candidates.

Modernized and Flexible Portals

Updated Interface
Portals now feature a new, sleek design, ensuring an intuitive user experience.

Enhanced Visuals: Administrators can easily modify colors, logos, and display settings, making it simple to align the portal with your brand identity.

Enhanced Job Search Experience

Faster Job Discovery
Candidates can find relevant job opportunities quicker with improved search functionality, custom tags, and a refined user interface.

Apply with SEEK Integration
Capture information in greater detail, enabling candidates to apply with just two clicks without retyping lengthy applications.

This release marks the beginning of our planned enhancements for our candidate, client, and vendor portals with more exciting functionalities to come this year.
