

EMAIL CONNECTOR

People, software, and email live together, in one place...

Improved Productivity

The TargetRecruit email connector integrates TargetRecruit with Outlook or Gmail. With everything in one place, productivity will improve dramatically.

Create new candidates or contacts

If you receive an email from someone new, you can simply add the person as a contact or a candidate, while still in Outlook or Gmail. You can also view all contact information, email history, and even your new contact's LinkedIn profile – straight from your inbox.

Create Job Orders

You can also create job orders right from Outlook or Gmail. For example, if a client sends you a job order in an email, you can create the job right in your inbox. Add details like account, start date, end date, hiring manager, job description and more. You can even automatch on the spot for a list of suggested candidates.

Visibility

You can view all TargetRecruit contacts, leads, accounts, opportunities or tasks in your email inbox. Work faster and unleash the power of information across your entire organization.

Chatter from your inbox

With the TargetRecruit Email Connector, you can chatter with your team about a contact or candidate from your inbox.
